REQUIRED

Experienced Psychiatrists for Senior Posts with the

Psychiatric Services

Saskatchewan Department of Public Health

There are a number of openings in mental hospitals, psychiatric wards of general hospitals, and mental health clinics for psychiatrists qualified to supervise general areas of the services provided by such facilities. Most of the appointments will be made under classification Senior Psychiatrist (salary range \$9,180 - \$11,172) for which the minimum qualifications include certification as a specialist by the Royal College of Physicians and Surgeons of Canada or, alternatively, the Diploma in Psychological Medicine and significant, diversified training and experience over a period of at least five years.

Suitable applicants will find that promotional opportunities occur rapidly in the expanding community, hospital and research programs. Such promotions may be to higher ranking positions in the mental hospitals, or to directorships of community out-patient clinics or psychiatric wards of general hospitals. Transfers within the Service to positions suited to the particular interests and aptitudes of the psychiatrist can usually be arranged with little delay.

Detailed information about these openings in a growing and progressive program may be obtained by writing to the Director of Psychiatric Services, Provincial Health and Welfare Building, Regina.
